

PROJECT SCOPE STATEMENT

Project Title: Dublin to Drupal

Date Prepared: 12/30/12

Product Scope Description:

The project will engage the students in initial needs assessment and the implementation of a functional prototype of a new website using Drupal 7. In general, the prototype will demonstrate all of the necessary functionality of a complete solution to support current and projected DCMI website needs.

Project Deliverables:

Specifically, the prototype will include:

- (1) Definition of user roles and permissions;
- (2) Recommended information architecture and process workflows;
- (3) Definition and implementation of community work and communication spaces; and
- (4) Mechanisms for integrating and leveraging social media at all levels from individual DCMI communities to site level in support of its “Metadata Ecology Watch.”

Project Acceptance Criteria:

The documented prototype will develop the necessary functionality for 2-3 existing DCMI entities that can be easily replicated across all current and future DCMI needs.

Project Exclusions:

Custom PHP coding
Significant graphic design

PROJECT SCOPE STATEMENT

Project Constraints:

Project staff time
Project and hosting funding

Project Assumptions:

Social media and other customized functions exist within pre-existing Drupal modules
